

Transvenous and Percutaneous
Biopsy Solutions

dextera[®]

Designed for
Superior Performance

The TLAB[®] Patel Set[®] addresses the need for improved safety and tissue sample collection. An independent study confirmed the TLAB[®] Patel Set[®] retrieved “better liver biopsy specimens” with more complete portal tracts.*

TLAB[®] Patel Set[®] Advantages

Optimal Specimens and Safety

Patented Flexcore[®] Technology maximizes specimen yield of complete portal tracts, even after multiple firings.

Full Notch Exposure maximizes yield.

Red-to-Red and Hub-to-Hub alignment maximizes yield.

Tissue Removal Swabs Maintains integrity of specimen and promotes safe, easy tissue removal.

Convenience and Economy

Choose the Set Configuration most convenient and economical for your practice.

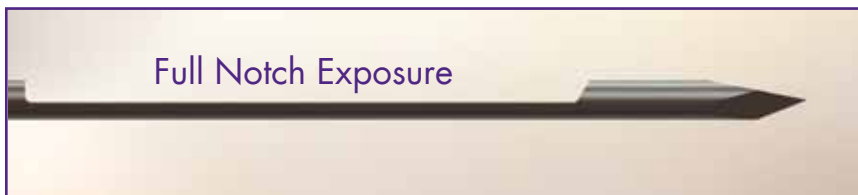

Choice of Needle: 18 ga or 19 ga

Some sets come with:

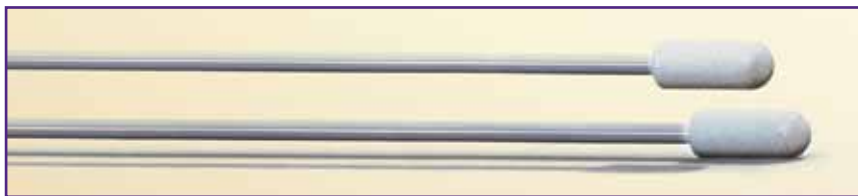

5 fr **Straight Catheter** with tapered tip for better trackability over guidewire.

5 fr **Curved Catheter** for guidewire access to the right hepatic vein.
(Not Available in All Markets)

With US Biopsy, you always have a choice.

Journal of Vascular Interventional Radiology 2011; 22:341-345

Since 1990 we have been relentless

about improving healthcare outcomes, the patient experience, safety, and tissue specimen integrity. We live this every day through the technology we design into our products and by practicing our Core Values: Integrity, Passion and Voice. Our “invented here” technology is covered by over 70 U.S. and International Patents, and our innovative products have been sold throughout the world under different labels for 20 years. We take your reaction to our products personally, so please contact us should you ever have a concern, comment or compliment, and you will see what we mean.

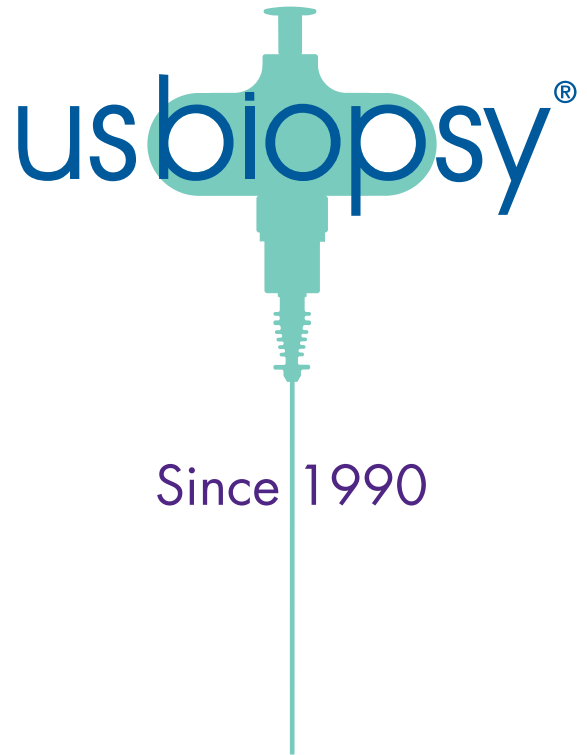

Like you, we do the right thing.

In medicine some tools just have to be disposable, so the particular disposable you select matters. We design and manufacture our products for robust performance in the smallest possible footprint. For example, we designed a more aggressive spring, instead of a bigger handle. While smaller devices cause less medical waste, the materials and vendors we select also help reduce our impact on the environment. Many of our vendors are local to our Indiana plant, which reduces transportation emissions. We also use an environmentally sensitive method of sterilization, enabling us to use a plastic with a neutral environmental impact.

Another right thing is our Quality Policy,

which gives each of us the right and responsibility to shut down the entire manufacturing process at any time if any one of us suspects something “might not be right”. So while other companies may have similar statements, our production cannot resume until the problem is resolved to the personal satisfaction of the team member who raised the concern. The result is our heart-felt commitment and personal attention to every unit we sell, which empowers us to say with conviction:

I am helping clinicians care for patients
by relentlessly practicing our Core Values:
Integrity, Passion and Voice.

TLAB® Patel Set®

Transjugular Liver Biopsy System

TLAB® Patel Set® Order number TL-18N

- 1 each- Flexcore® Biopsy Needle, 18 ga, 64.5 cm overall length, 16.5 mm notch, 20 mm throw
- 1 each- 7 fr Stiffened Introducer with Protective Sheath, 61.2 cm overall length
- 4 each- Tissue Removal Swabs, 4 inch length, polyurethane foam tip, nylon handle

TLAB® Patel Set® Order number TL-18S

- 1 each- Flexcore® Biopsy Needle, 18 ga, 64.5 cm overall length, 16.5 mm notch, 20 mm throw
- 1 each- 7 fr Stiffened Introducer with Protective Sheath, 61.2 cm overall length
- 4 each- Tissue Removal Swabs, 4 inch length, polyurethane foam tip, nylon handle
- 1 each- 5 fr Straight Catheter, 65 cm overall length

TLAB® Patel Set® Order number TL-18C

(Not Available in All Markets)

- 1 each- Flexcore® Biopsy Needle, 18 ga, 64.5 cm overall length, 16.5 mm notch, 20 mm throw
- 1 each- 7 fr Stiffened Introducer with Protective Sheath, 61.2 cm overall length
- 4 each- Tissue Removal Swabs, 4 inch length, polyurethane foam tip, nylon handle
- 1 each- 5 fr Curved Catheter, 76 cm overall length
- 1 each- 5 fr Straight Catheter, 65 cm overall length

TLAB® Patel Set® Order number TL-19N

- 1 each- Flexcore® Biopsy Needle, 19 ga, 64.5 cm overall length, 16.5 mm notch, 20 mm throw
- 1 each- 7 fr Stiffened Introducer with Protective Sheath, 61.2 cm overall length
- 4 each- Tissue Removal Swabs, 4 inch length, polyurethane foam tip, nylon handle

TLAB® Patel Set® Order number TL-19S

- 1 each- Flexcore® Biopsy Needle, 19 ga, 64.5 cm overall length, 16.5 mm notch, 20 mm throw
- 1 each- 7 fr Stiffened Introducer with Protective Sheath, 61.2 cm overall length
- 4 each- Tissue Removal Swabs, 4 inch length, polyurethane foam tip, nylon handle
- 1 each- 5 fr Straight Catheter, 65 cm overall length

TLAB® Patel Set® Order number TL-19

(Not Available in All Markets)

- 1 each- Flexcore® Biopsy Needle, 19 ga, 64.5 cm overall length, 16.5 mm notch, 20 mm throw
